BOSWELLIA SERRATA EXTRACT

STANDARDIZED WITH 10% AKBA

Phytochemicals found in oleo-gum-resin of *Boswellia serrata* (Indian frankincense) called boswellic acids, helps prevent inflammatory disorders. The oleo-gum-resin of *Boswellia serrata* contains pentacyclic triterpene acids like acetyl-boswellic acids and beta-boswellic acid. Among these boswellic acids Acetyl-11-keto- β boswellic acid (AKBA) is the most potent. Studies have shown that boswellic acids supports healthy inflammatory response similar to that of Non-steroidal anti-inflammatory drugs (NSAID).

Boswellic acids inhibits pro-inflammatory mediators in the body, such as leukotrienes. As opposed to NSAIDs, long-term use of boswellia does not appear to cause irritation or ulceration of the stomach or cardiovascular adverse effects.

AKBAMAX® containing mainly Acetyl-11-keto- β -Boswellic acid which works through natural LOX-inhibitor anti-inflammatory mechanism.

Regular extract of *Boswellia serrata* contains only negligible amount of AKBA and mainly beta boswellic acid. In AKBAMAX® the presence of AKBA is enriched to 10% and that of beta boswellic acid is reduced to negligible level which acts as pro-inflammatory at times.

Well documented safety data suggest that AKBAMAX® is well-tolerated and safe to use.

AKBAMAX® AT A GLANCE

Standardized with 10% Acetyl-11-keto- β boswellic acid (AKBA)

Clinically proven to support Joint Health & Healthy inflammatory response

Natural Inhibitor of Leukotrienes (LOX)

AKBAMAX® is five times more potent than conventional *Boswellia serrata* extract

Unique *Boswellia serrata* extract with synergism of acetyl group of boswellic acids

Safety and efficacy documented by multiple studies

INDICATIONS FOR USE

Supports Joint Health & Healthy Inflammatory Responses

Helps support Pain Relief

APPLICATIONS

The Product is available as Free Flowing Powder for Capsules, Tablets and also as Water Dispersible Powder

DOSAGE

250-500mg, in one - Two Times /Day

100+ Published Patents

Customers in 60+ Countries

30+ Years Legacy
